AUTOMATIC REELS

# SLOW MOTION

We slow down the movement, not your work.

MADE IN ITALY  
Designed and Manufactured

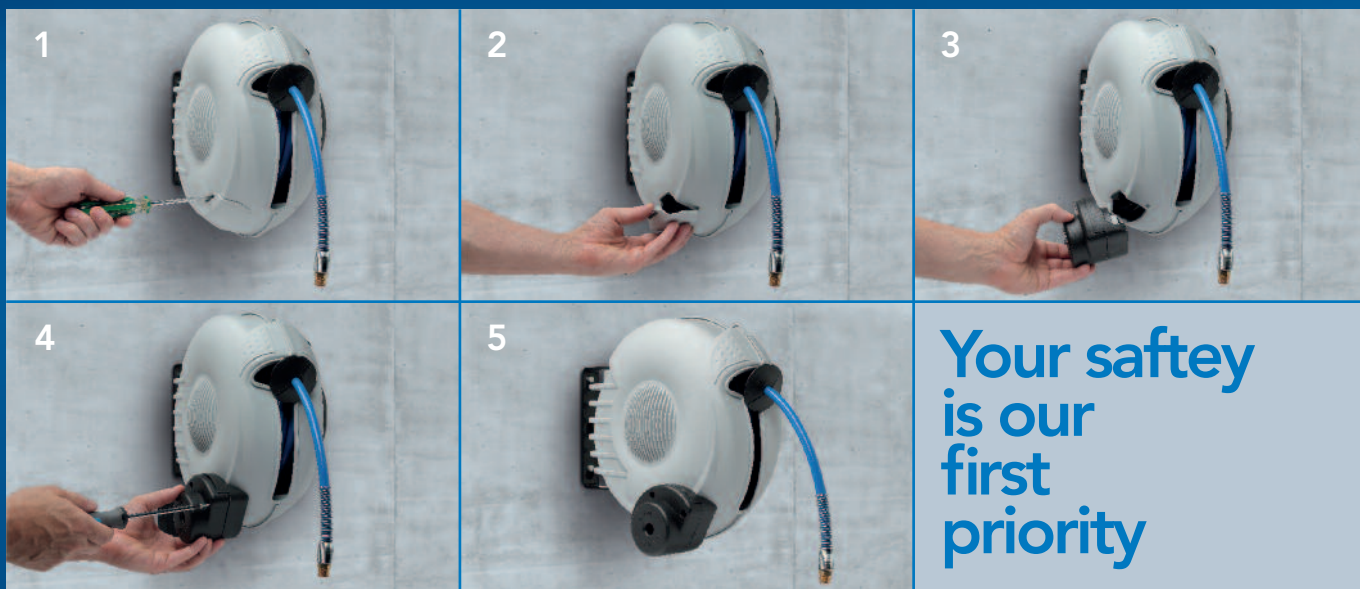

In normal reels, the cable returns to its seating quickly and uncontrollably, requiring the operator to accompany it, which means time wasted. To help resolve this issue, in 2010 Mavel - a manufacturer of high-quality reels, designed and patented the very first and one-of-a-kind external device that can be easily installed and removed.

A simple yet ingenious idea. **Slow Motion** is in fact an optional, high-performance device that **controls and slows down rewinding**, in a uniform manner, thereby eliminating jerking and whiplash. The result? Improved safety, a tidier working environment, and less time wasted.

Mavel Slow Motion: easy to install, practical to use, simple to replace.

go slow, be happy  
Practical, easy and fast assembly!

Your safety  
is our  
first  
priority

EV reel

A step into the future, here and now. Electric cars are a rapidly-developing reality and an electric cable without a reel is like a smartphone with no connection!

Which is why Mavel came up with and designed a convenient automatic reel, the EV charging reel, the perfect accessory for your wall box.

Thanks to our EV charging reel, the electric cable used to charge your car will always be unwound to the perfect length, thereby avoiding the annoyance of it resting on the ground, exposed to dirt and pollutants, in addition to risking its rapid deterioration.

Perfect for private use, corporate car parks, hotel garages and any location where having a charging source on hand is a necessity.

The EV charging reel comes with a 5 m cable with type 2 connectors (on the wall box side), and your choice of type 1 or type 2 connectors on the car side. In addition, thanks to the exclusive Slow Motion safety system, which slowly retracts the cable, the Mavel cable reel for electric cars satisfies even the most demanding convenience and security.

**A BURST OF ENERGY FOR YOUR BUSINESS**

Optimize productivity and safety with the retractable electric cable reels from **Mavel**:

- Organisation: a place for every cable and every cable in its place!
- Time-saving: no more knots, tangles, or cables spread over the floor.
- Integrity and duration: cables perfectly wound and protected, thus reducing damage and wear to a minimum.
- Protection and safety: the operator can move more freely and concentrate on the task at hand without having to risk tripping and slipping...

**General characteristics:**

- Shockproof plastic structure.
- Available with various types of cable: in PVC (H05VV-F) or high-quality rubber, either single-phase or three-phase. Lengths from 6 to 35 metres.
- Circuit protection against thermal or amperometric overloads.
- Device to block cable at the desired length (it can be disabled if continuous drive is needed).

**Optional: SLOWMOTION** system, can be applied to most of the **ENERGY** series.

### A BREATH OF FRESH AIR!

The **Mavel** retractable hose reels are an essential tool for your business, greatly appreciated by operators. The device offers many advantages: hoses always of the right length, handily unwound and rewound, with no knots, undamaged and protected. Order and cleanliness in the workplace, practicality, time-saving, and increased productivity round out the list of pros that make this accessory an absolute must.

#### General characteristics:

- Shockproof plastic structure with metal bracket.
- Available with different types of hoses: in PU or high-quality PU/PVC blend for pressures up to 20 bar. Lengths from 6 to 20 metres.
- Device to block cable at the desired length (it can be disabled if continuous drive is needed).

**Optional: SLOWMOTION** system, can be applied to most of the **AIR** series.

**“FLUIDS”... AND EVERYTHING FLOWS SMOOTHLY!**

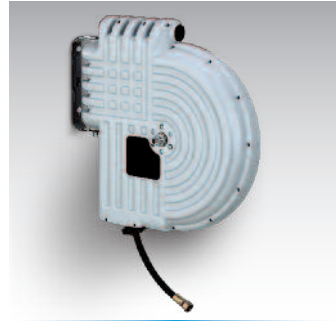

A family of retractable reels for fluids capable of facilitating and optimizing a day's work. The standard version comes with a swivel and fixed steel bracket (The standard Roll PPROFI comes only with the swiveling bracket, but can be supplied with a fixed bracket upon request), suitable to be installed on the wall, ceiling or floor.

The reel structure is made in solid, shockproof plastic. Available without hoses or with different lengths and sections of hose (from 15m 1/4" to 20m 1/2").

**Suitable for conveying:**

- Oil: max 60bar 40°C
- Water: max 200 bar 150°C

**FOR TRUE RELAXATION WHILE GARDENING...**

The **GARDEN** series is a must. Constructed according to the strictest quality standards, made completely in shockproof plastic, practical and functional, this device ensures an orderly winding of the hose, making it easier and safer for enthusiasts and professionals alike.

**Available hose lengths:**

20m or 30 m, 1/2", or 20m, 5/8".

**ROLL MAXI EVO** with optional **SLOW MOTION** system:

gradual winding of the hose in complete safety without tearing or whiplash.
